Illuminate
your identity
& define
your space

Enhanced Visibility

Seamless Guidance, Day or Night. Our integrated LED illumination ensures visibility is never a question, eliminating operational ambiguity across all hours. This thoughtful lighting solution doesn't merely define space—it intuitively guides patron flow, maintaining effortless elegance and preventing the visual disruption of congestion.

Dual-Function Design

Design Integrity, Doubled. Why clutter your space? This piece is engineered not only as a robust barrier but as a discreet, ambient light source. It's true space economy: maximizing the utility of every element without compromising the visual coherence of your premium environment.

Customizable Aesthetics

Curated to Your Signature Style. Choose from a refined palette of colors and effects that serve as a direct extension of your brand identity, event concept, or architectural vision. This level of aesthetic control ensures the safety solution is always a harmonious element of the overall design.

Stand out,
on nights out

Sustainable Illumination

Our advanced LED technology delivers maximum clarity with minimal draw. This efficiency not only reduces your operational cost but aligns seamlessly with the sustainability standards expected by modern, discerning patrons.

Effortless Integration

Engineered for rapid configuration and secure stowage. This design focus ensures quick, non-disruptive deployment for your staff, maximizing venue flexibility and minimizing downtime between events.

Robust & Durable

Constructed with materials specified for longevity, this system is inherently capable of enduring heavy patron traffic and demanding environments. Without ever compromising aesthetics.

Modular Design

Barriers interlock with precision, offering the ultimate in layout flexibility and on-the-fly adaptability for any space and situation. Nova barrier system is seamless compatible with our non-illuminated *Securit® Retractable* system and signage.

N O V A

LED Barrier System

This multi-functional innovation elevates your indoor or outdoor space while expertly managing patron flow. Crafted from polished stainless steel that resists water damage.

Select from lighting modes, including gradient shifts and single colors, to perfectly distinguish your venue's ambiance and identity. Experience the next evolution of crowd management, seamlessly integrated into one sophisticated solution.

IP54-rated

Multicolor LED technology

The bright illumination intuitively guides crowds, ensuring smooth flow while actively communicating your venue's aesthetic.

Built-in battery

The built-in power source delivers true operational freedom, enabling seamless placement anywhere in your venue without the constraint of being tethered to a power source.

NOVA

Technical Specs

- Runtime: 12–120 hours (mode and brightness dependent)
- Charging time: 7 hours
- Easy magnetic charging cable
- RGB + Bright White colours
- 3 Levels of illumination intensity
- 10 Dynamic modes
- Remote control included
- IP54 weather resistance
- 8.5 kg net weight
- 205 cm chord length
- Anti-scratch base for delicate floors
- Brushed stainless steel construction
- Article ref: RS-RT-RGB-NV
